Welcome to Green Mountain **RED** Angus!

Welcome to our 25th bull sale! Everything starts somewhere, and our first bull sale in March of 2020 was a result of working our herd up through the ranks to a point where we could progress from Private Treaty sales. Bob's father, Jim Morton, had always dreamed of having his own bull sale in his own sale facility, and that plan was put into action in 1999. Plans were drawn up for a sale facility and construction started in the fall. We decided to hold our sale on the third Tuesday of March, and that date still holds. Unfortunately, Bob's dad passed away in November of 1999, and never saw his dream become reality. We all worked hard to meet the March deadline in the 3 months after his death, and we believe he is elated to see us holding our 25th annual sale.

Since that first sale we have seen a lot of changes at GMRA. We have grown the herd by over 100 head. We have expanded feedlots and grow out more cattle than ever. We now hold a female sale with three of our contemporary breeders in the area every fall. In the early 2000's we hired Jeremy Dunbar, who has moved on, but he and his family are still a vital part of our bull sale with their own consignments.

On the personal side, Tom and Katie welcomed a baby boy on November 13, 2023. Buck Walter Morton is a 6th generation Montana rancher, and carries a strong name. His maternal great-great grandfather, Buck Foran, was a phenomenal bronc rider in the early 1900's, and rode in Madison Square Garden. His maternal great grandfather, Walter Steingruber, was an innovative commercial rancher who worked his family's Montana ranch near Three Forks his entire life.

Jim is vital to the operations at GMRA and is excelling as a professional photographer as well. One of the highlights of this last year was his contract with local vintners to provide wine labels for their new enterprise. The first one, Cowboy Cabernet, is available, and there are more varieties on the way.

Bob and Julie are still at the helm, but continue to hand over more of the day-to-day leadership and decision-making to the boys. They are enjoying life as grandparents and watching Tom, Jim, and Katie become more and more invested in the future of GMRA. This fall we hired a new man, Wynne DeVorss. He hails from Missouri and is a heck of a good hand. We are lucky to have found someone willing to work and ride for the brand.

The crew at Green Mountain Red Angus would like to thank you for putting your trust in our program. We hope you enjoy looking at the genetic packages offered in this catalog. Please reach out if you would like any additional information to help with your genetic selections. We look forward to seeing you on sale day!

Get off 1-90 at the Logan Exit, #283. Go north and take a left on the frontage road. Proceed west toward Three Forks, about 1/2 mile. Take a right onto Logan Trident Road, heading north. The road immediately crosses the Gallatin River and the railroad tracks, as shown on the map. Green Mountain Red Angus is 2 miles from the railroad tracks. Watch for the large Green Mountain Red Angus sign.

The entire GMRA herd has undergone GGP-LD testing and have genomically enhanced EPDs and parent verification.

**TERMS AND CONDITIONS**

1. The terms of the sale are cash unless prior arrangements have been made.
2. Each animal will be sold to the highest bidder. The person in charge will settle any disputes as to bids, and his decision on such matters shall be final.
3. Any announcement from the seller on sale day will take precedence over printed material.
4. Health certificates will be furnished for shipment anywhere in the United States.
5. Each animal becomes buyer's risk as soon as sold; but it shall be the obligation of the seller to see that animals are fed and cared for, free of charge to purchaser, until loaded for shipment or until the expiration of April 1st of the current year.
6. Retained Interest: Green Mountain Red Angus is retaining 50% revenue share interest in all bulls in the sale. We reserve the right to participate in the collection and marketing of semen. Buyers receive 50% interest, full possession and full salvage value. If seller wishes to collect semen for in-herd use only it will be at seller's expense and the buyer's convenience. If the buyer wishes to share in the collection costs and keep his share for in-herd use that is their choice.
7. All claims for adjustment or refund must be made in writing within six months of the sale date. In the event an animal is claimed to be a non-breeder, the Seller shall be entitled to six months' trial following the return of the animal in which to prove the animal is a breeder. If at the end of six months the Seller is unable to prove the animal is a breeder, restitution shall be made, in compliance with the terms set forth by the Red Angus Association of America. Any expenses incurred for transporting the animal shall be the buyer's responsibility.
8. Everyone attending this sale does so at their own risk. Owners, clerks or other helpers do not assume responsibility, legal or otherwise, for damages of any kind.
9. A certificate of registry and transfer will be furnished for each animal sold as a registered animal, after settlement has been made.
10. The above terms and conditions shall constitute a contract between the buyer and seller of each animal sold.

**These cattle do sell in accordance with the Sale Terms and Conditions  
set forth by the Red Angus Association of America.**

## A-BAG-A-BULL

**RED ANGUS**  
RANCH TESTED. RANCHER TRUSTED.

If you purchase a bull from us, we will provide you with credit equal to the value of one bag of Feeder Calf Certification Program or Allied Access tags for each bull you purchase. To redeem your credit, bring your receipt for the tags to next year's sale and we will apply it to your bull purchase.

The FCCP provides age, source and genetic verification for calves sired by registered Red Angus bulls. The FCCP 'yellow tags' are recognized by buyers nationwide and return a premium for Red Angus calves enrolled in the program.

The Allied Access program provides age and source verification for commercial cattlemen whose bull battery does not exclusively contain registered Red Angus bulls. Whether you are utilizing multiple sire breeds or halfblood bulls, enrolling in Allied Access demonstrates to buyers that you are taking an extra step in marketing your calves and adding value throughout the production chain.

To enroll in the FCCP or Allied Access, contact the Red Angus marketing department. Enrollment is simple and free of charge.

## DELIVERY ARRANGEMENTS & PRICING

Organization of trucking is more challenging than ever and we appreciate your understanding of our delivery policy and look forward to working with you to ensure the most effective means of transfer of ownership. Delivery arrangements and pricing are outlined below, and we encourage you to review. Please visit with Bob or Tom prior to leaving the sale if you have questions. One of them will be in contact with you within a week of the sale to coordinate delivery.

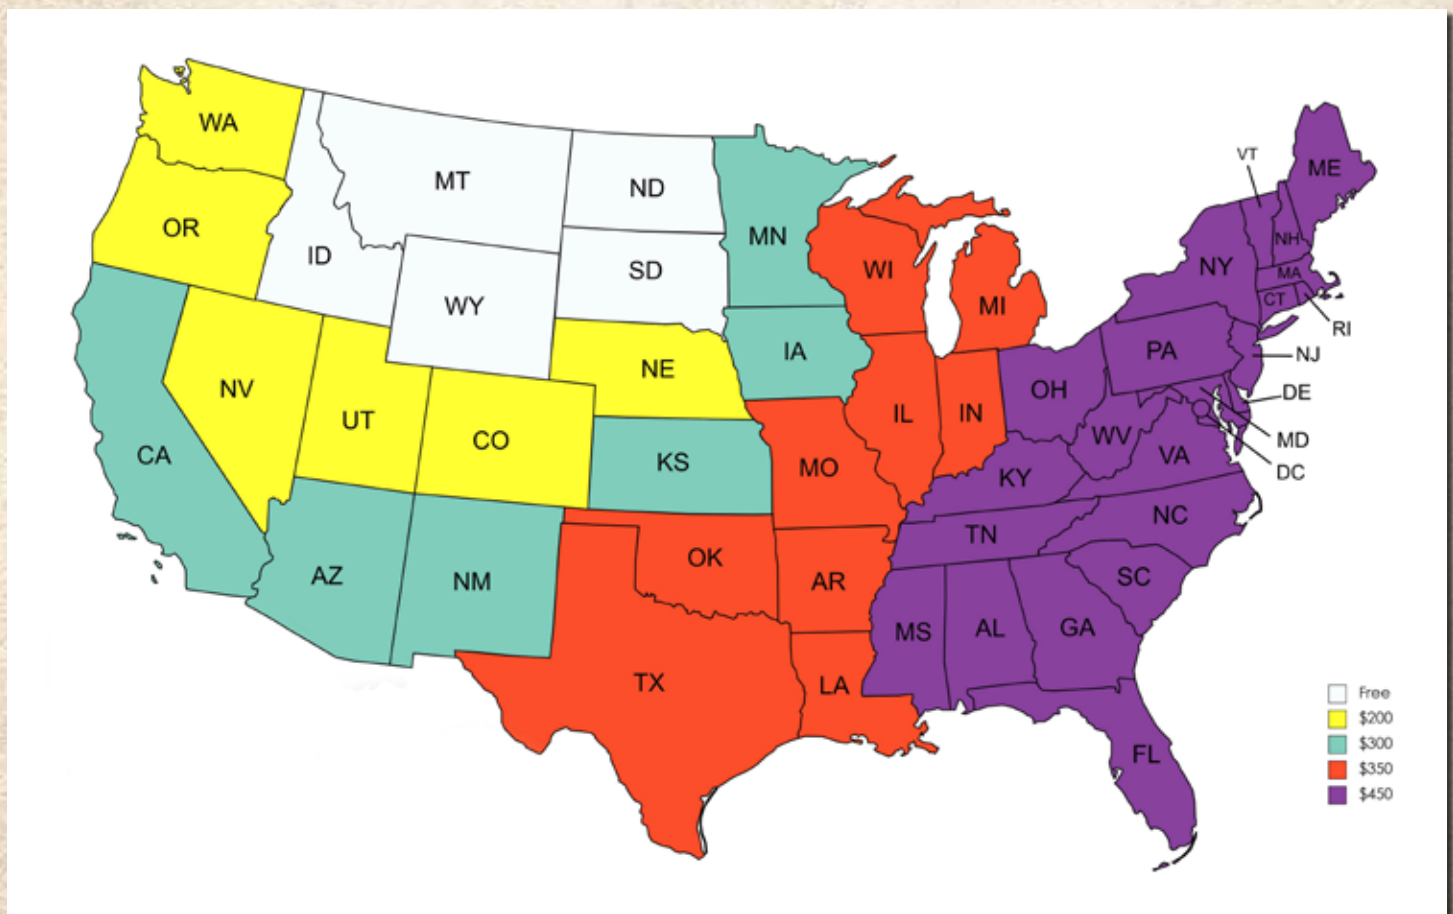

### DELIVERY PRICING

We will offer **FREE DELIVERY TO CENTRAL POINTS** in Montana, Idaho, North Dakota, South Dakota & Wyoming. For all other states, delivery will be charged to **CENTRAL POINTS** on a per-head basis on the pricing outlined on the map below. **Pricing will be charged based on your physical address.** Delivery charges will be added to each invoice at check out, unless you plan to load out within 7 days of the sale.

### CENTRAL POINTS

All delivery will be organized to **CENTRAL POINTS** within the state. Delivery WILL NOT be organized to your home or ranch. Loads are delivered by semi-truck and require drop off points along their route with a loading chute and location to house livestock. You are expected to meet the semi-truck driver at the central drop-off point as communicated by them. Central points for delivery include auction barns, vet clinics and other locations determined by the semi-truck driver at the time of delivery. Pricing to these central points will be charged to you based on your physical address. The driver will be given your contact information and will communicate with you regarding the drop-off time and location.

Thank you for your cooperation in arranging delivery dates and the pick up of your cattle at central delivery points within your state. This will keep the cattle from being on the semi-truck longer than necessary and will help to get your animals to you with the least possible stress and in the best possible condition. Please let us know if you have any questions.

## What is Top Dollar Angus?

Top Dollar Angus is the beef industry's leading genetic verification and marketing assistance company for commercial feeder cattle. We focus exclusively on Angus- and Red Angus-influence cattle ranking in the Top 25% for growth and carcass traits.

Our focus on these traits is driven by the needs of our feeding partners. In today's marketplace, cattle feeders must know the cattle they buy will stay healthy, grow quickly and efficiently, while also delivering high-value carcass traits. Top Dollar Angus verifies cattle with Top 25% genetics, presenting feedlots with a product they can trust.

The relationship between Green Mountain Red Angus and Top Dollar Angus rewards our buyers who focus on producing profitable cattle and provides them with the genetics to be successful in today's marketplace. Top Dollar Angus magnifies that success by connecting Top Dollar Angus feeder calves with our ever-growing network of feeding partners.

*"The Morton Family at Green Mountain Red Angus exemplifies the term 'customer-oriented.' A perennial 'Top 5' Top Dollar Angus Seedstock Partner, they have the highest customer utilization: bulls sold ratio of any Seedstock Partner. They truly are a powerhouse when it comes to making sure their customers are taken care of."*

## How Do I Enroll?

Learning more about Top Dollar Angus Feeder Partnership enrollment is simple.

1. Contact a representative listed below via phone or email. Please share your phone number and email address.
2. Answer a few questions about your operation's background including bull suppliers and, if available, registration numbers on bulls used in your herd.
3. Submit any of the following for a free genetic evaluation.
  - **Registration Numbers** – A five- to seven-year history with more years preferred. Many seedstock breeders can help supply this information.
  - **Commercial DNA test** such as:  
Igentity Beef by Neogen  
GeneMax or Inherit by Zoetis
  - **Recent carcass data on your cattle**
4. Submit your information for review. After your evaluation, we will notify you about your cattle's qualifications and ranking or be able to advise you on adjustments and improvements you can make to qualify.

Growth and power! There is a need for power bulls to pick up where the heifer bulls leave off, and this guy will do it in style. One look and you see the power of the phenotype and it is impressive. He is very square-topped with a tremendous rear quarter. He is masculine-fronted with a smooth shoulder and a broad chest floor. Feet and leg scores are excellent and he strides out well. Extra length and tremendous spring of rib are evident. He ranks as the top bull on test for actual and adjusted WW and YW and both ratios, and the #1 WDA and ratio. Carcass scans and ratios are outstanding across the board and he turns in the #1 actual and adjusted REA. His dam posts a 106 MPPA on 6 that places her in the top 6% of the GMRA herd. Her average WR is 108, YR 103, IMF 115, and REA 108. Numbers don't deviate from supporting the performance. Eight are in single-digit percentiles from indices, to growth, maternal and carcass. This is one of those rare packages that combines all economic indicators with top-notch performance and phenotype.

We've been in the market for herd sires this year and looked at a lot of bulls. This bull will float to the top of anyone's wish list. He has been a standout since he hit the ground and gets noticed. Phenotypic evaluations sum it up with above average marks for length, depth, capacity and extreme thickness. As we evaluate, I type as fast as Bob talks and notes read: huge nuts, broad topped, ribeye pops, square butted, good disposition, broad stance and chest floor, smooth shouldered. His dam is from the performance-minded Lakota family. She posts an MPPA of 102 on 5 with an average WR of 102, YR of 105, IMF ratio of 119 and REA ratio of 106. This bull follows suit with every measurable trait resulting in ratios all the way up to an IMF of 136 and FAT of 156. His number package is one of the strongest in the offering with 14 in the top 35% of the breed or higher and over half in the top 9%. There is a tremendous birth to growth spread with all calving ease and performance numbers in the top 9%. Here is a true 'no holes' curve bender.

A high-production, performance-minded Brunswick dam weaned off this Stockmarket son. She posts a 102 MPPA, with an average WR of 103, YR of 110, IMF ratio of 129 and a REA ratio of 109. Her calves never stop once they hit the ground. This bull has the #5 actual WW and the #2 YR. He is tied for the #1 IMF ratio and the highest actual IMF in the offering. He is the only bull in the class with 11 EPDs in the top 10% of the breed or higher with the #1 ProS in the offering! If you like pounds at weaning and performance on the rail, this bull hits it all. His phenotype matches up with a nice broad top that carries down to a square rear quarter. At evaluations he received top marks for length, depth and capacity, and thickness.

Here's another one that fits into Bob's 'Cool Bull' category. He's a nice cherry red with a square top and big rear quarter with a ton of depth and great spring of rib and a nice set of wheels. Definitely sports that power bull look. His dam posts a 106 MPPA, ranking her in the top 10 dams in production in the herd. She has an average WR of 110 and YR of 107 and has never weaned a calf under 107. All progeny yearling ratios are 102 or higher. The maternal line never sees an MPPA under 101 for over 30 years. The number package is incredibly complete with 14 in the top 1/3rd of the breed or higher and over half of those are in single-digit percentiles. A bull that will stay relevant in your bull battery for years.

Personal performance is the name of the game and proves out with a suite of ratios ranging from 104-118. His young dam is currently in the top 10% of the herd with a 105 MPPA. Breed leading growth and Marbling combine nicely with a high-end HPG and Milk. He is tied for the #1 actual and adjusted IMF and his WW and YW EPDs are at the top of the class. Look for extra thickness and tremendous length.

The Foreman calves are built right and come easy. This bull was out of a first-calf heifer and his performance at weaning gives her an impressive 107 MPPA, ranking her in the top 4% of the GMRA herd. He posts the #3 actual WW, the #4 adjusted, and the #2 WR. Contradictory traits are not mutually exclusive. His numbers sit in the top 1/3 of the breed for calving ease, yet he still posts single-digit percentile growth. Good muscle expression lends to a nice profile with a clean front and a masculine head and neck.

This phenotypically perfect bull is the standout of the DDRA bulls on test. He just does everything right. He's super stout with a defined, yet smooth muscle pattern. He showcases extra length and thickness with abundant capacity and spring of rib. His feet and legs are outstanding and provide a solid stance. The maternal family is full of high-end production with MPPAs as high as 110. His experienced dam has a 104 on 8 with an average WR of 104 and YR of 106. His own personal performance ranks him with the #3 actual WW and WDA. The number set starts off with single digit percentile ProS and HB, leading into high-end growth, maternal and carcass. This bull does it all and will be a staple in your bull pen.

Evaluation notes: 'Good-looking bull. VERY attractive. Just put together right.' He is extremely straight-topped with a very attractive profile, a perfect set of feet and leg scores, and a cherry red coat. All measured traits post ratios ranging from 100 to 128. His numbers show a big birth to growth spread and the #1 HPG in the class. Overall, 13 numbers rank in the top quarter or higher. Breed heifers or mature cows – he can fill any slot.

Proof that the Brunswick dams are high-production is right here! Her first calf was a Tesla son that went to Buee Cattle Co. in North Dakota. She has an impressive 108 MPPA that sits at #4 in the GMRA herd. She has an average WR of 111 and YR of 106. This bull turned in the #4 actual and #5 adjusted WW, and is tied for the #5 actual YW. His ADG and WDA ratios sit at 108 and 106, respectively. He also turned in an impressive 125 IMF ratio. Phenotypic evaluations mark him for extra length and thickness and way above average capacity with a broad chest floor. A breed-leading set of growth numbers are nicely matched to the performance. If you want pounds at weaning with a high marbling carcass, look no further.

Can you say replacement maker? This stylish bull has a top 1% ProS, HB and Stay. His great granddam was our choice of the bred heifers at the 2012 NILE. In 2020, she raised GMRA Apache 0233H, who was purchased in our 2021 bull sale by Bar Open A Red Angus of Hamer, ID. Apache has gone on to be one of our main AI sires. The Dory-Jiba maternal pedigree has straight lineage MPPAs over 100 going clear back to a 1988-born dam. Along with impressive maternal numbers including the #1 HB and Stay in the offering, you see breed-leading growth and strong carcass. Look for extra length, capacity and thickness.

An absolute power house of a bull! Phenotypic evaluation landed him with positive marks for length, depth of rib and overall capacity with abundant thickness in the rear quarter. He is square butt, broad topped and super straight. He moves out with a nice stride and travels well on a great set of feet and legs. His personal performance ranks him with the #4 actual and adjusted YW, the #1 ADG and the #4 WDA in the class. Numbers are impressive with seven in the top 9% or higher, including ProS, all growth indicators and Marb and CW. If you need to add pounds at weaning and turn in great kill data this bull can do it all.

This bull brings a lot to the table. His maternal pedigree is performance-minded with multiple generations of 102+ MPPAs. His dam posts a 106 MPPA on 2 with an average WR of 110, YR of 106, Fat Ratio of 114, and REA Ratio of 108. His personal performance gives him the #3 WR, #5 YR, 2nd highest actual WW and 5th highest adjusted WW. He is tied for the 5th highest actual YW and has the #3 adjusted YW. ADG and WDA ratios are both at 105 and IMF and REA ratios are both over 100. Growth and carcass numbers are outstanding with 6 in the top 5% or higher, and the #1 WW, YW and ADG EPDs. Look for extra length and spring of rib.

Here is one of only 3 bulls in the offering with 13 EPDs in the top 25%! Top 10% for all indices. Top 1/3 calving ease. Single digit percentile growth. Maternal standout and impressive carcass. He comes from the Peacha cow family with MPPAs ranging from 101-107 going back 35 years. His dam is sitting at 103 with an average birth weight of 74lbs., an average WR of 105, YR of 108, IMF ratio of 102 and average REA ratio of 103. All of this matches an outstanding phenotype with an attractive profile with a smooth shoulder, and abundant depth, capacity and thickness. Don't pass up this extremely complete King James son that can start in the heifer pen while he's young and move into high-end production for your mature cows.

Everywhere you look this Energize son has standouts from genotype to phenotype. Personal performance hits all the marks with every measurable trait ratioing above average. His young dam is posting a 105 MPPA, following generations of longevity in the herd. His number set is as solid as it gets with over half of his EPDs in the top 18% or higher with standouts across the board. Extra capacity and thickness and a great set of wheels round out the package.

Bridger Chambers, professional steer wrestler and all-around good guy, sponsored by Green Mountain Red Angus

The Patriot sons are at the top of the game with moderate birth weights followed up by performance in all facets of production. Growth and gain continue on through yearling and back up a great set of performance EPDs. All Carcass sits in the top 38% or higher with several maternal standouts. His dam represents the best of the Peacha cow family. She has a 103 MPPA, below average birth weights and an average WR of 104. All straight lineage dams post MPPAs of 101 or higher for multiple generations. Great capacity, abundant thickness and a wonderful disposition round out the package.

Personal performance, top-notch EPD package, high-production maternal pedigree – this guy has it all! Here's another Lakota cow family standout with MPPAs all the way up to 112 in the direct lineage. Dam raises calves with below average birthweights that turn into growth through yearling, with an average YR of 109. He ratioed 119 for ADG, which is #3 in the offering, and 112 for WDA. REA Ratio of 125 with the #3 actual and #5 adjusted REA of all bulls on test. All indices in the top 11% of the breed or higher and standouts in all facets of production. Overall, he has 13 in the top 26% and an impressive 16 of 19 in the top 38%. Look for abundant capacity with a square top and a perfect set of feet and leg scores.

This bull is another standout in the long line of progeny from GMRA Larkaba 313. Longevity is strong, with an MPPA of 109 on 10, which places her in the top 4 cows of the herd. Below average birth weights excel to an average WR of 110 and YR of 106. She has never raised a calf with a weaning ratio under 100. Lots of capacity sits atop a great set of feet and legs. HB and Stay are in the top quarter of the breed along with WW and YW. Wean 'em and feed 'em, or make replacements with the top Milk EPD in the class. The choice is yours!

This Patriot son is a product of the highly productive Peacha cow family. His dam posts a 104 MPPA with an average WW of 106 and an average YW of 104 on 4 head. ProS and HB indices are strong and backed up by a top 2% Stay that is tied for #4 in the offering. He offers abundant growth and tops it off with a consistent set of high production carcass EPDs. He has a nice masculine look that is straight-topped and clean-fronted and he scored top marks for extra length, capacity and exceptional thickness in the rear quarter. Just a very well-rounded bull that will put profit in anyone's herd.

Laney Dunbar should be able to put aside a nice chunk for college after selling this bull! Nice disposition, perfect feet and leg scores and extra length and thickness. What's not to like? He posts the #3 actual YW, #4 actual ADG, and #2 WDA in the class. Numbers match up with single-digit percentile growth and eight numbers in the top 24% or higher overall. His maternal pedigree carries some stand-outs, such as the granddam, who is still in production at GMRA, posting a 111 MPPA on 10, sitting at the top of mountain pasture. This bull's dam is no different and at 9 years of age has an outstandingudder and feet. She posts a 103 on 7 with an average WR of 103 and has never weaned a calf under 100. If you want a bull that can create pounds at weaning and replacements that stay in the herd, this is the one.

This bull hit the ground with a nice, moderate birthweight, and kept growing through yearling. Carcass scans are all above average. He is a tank with extra depth and capacity and a very broad top. He's still got that heifer bull front end, with a small head flowing into a smooth shoulder and a near perfect set of feet and leg scores. His young Nexa dam has a 101 MPPA.

This heifer bull comes from the impressive and long-lived Pridstom cow family. You have to trace the direct maternal lineage back to a 3-digit registration number cow born in 1956 before you find an MPPA under 100. This bull ranks for some of the best calving ease numbers in the offering, impressive Milk and top-notch ProS and GM Indices. At evaluation time he received perfect marks for feet and leg structure and strides out nicely. He carries above average depth, capacity and thickness with a broad top and square rear quarter with good muscle expression. There is lot more than just calving ease in this genetic package.

That great Rebella cow family you can read about in Lot 22 is backing up this incredibly attractive Capital Gains son. In that footnote we had mentioned outstanding feet and udders in the maternal pedigree and this bull's dam is no different, proving out the longevity in the maternal line. This bull showcases a square top that leads into a deep rear quarter and a broad chest floor. He is tight sheathed with extra length and capacity and a nice profile. There's a lot of potential here and it's backed up by a great number set with single-digit growth and high-end marbling, while birth stays in the top 1/3 of the breed. Calves will hit the ground and grow through yearling.

The phenotype makes this bull a standout. He ranked with above average length, depth and capacity and way above average for thickness. His masculine neck blends into a clean front end and tight sheath. His quarter is impressive and carries down with great expression. All sits atop a great set of feet and legs. Disposition is outstanding!

There are only 2 bulls in the offering with 17 of their 19 EPDs in the top half of the breed and here is one of them! He is a true curve bender bull with birth numbers in the top 29% of the breed while all growth indicators rank in the top 18% or higher. His pedigree is full of performance-minded females with several generations of MPPAs over 100. He carries extra length and his moderate frame will keep calves coming easy, yet give them enough size to produce at weaning.

The first thing you do is look at the birthweight. Then the growth ratios... WAIT! Keep reading! There's a reason we keep a 100+ pound bull in the sale. He is just a cool bull, and is extremely well-muscled with extra depth of rib, capacity and thickness, and a perfect set of feet and leg scores. One look and you should be convinced. The maternal power is all there and you have to follow the direct lineage back to '94 before you find an MPPA under 100. His numbers are all there as well, with single-digit growth, CW, YG, REA, and GM Index. So he's not a heifer bull (neither are a lot of you)... turn him out with the mature herd and don't worry about a thing!

First comment at evaluations was that this bull looks just like his sire. Not a bad thing – broad top, square butt, extra capacity and good muscle expression! His Brunswick dam posted her own outstanding personal performance. Unfortunately, she had to be put down on the mountain this fall, but she posted a 107 MPPA. The maternal line never dips below a 101 MPPA for multiple generations. Single digit percentile WW, YW, YG and REA prove out the #5 WR and the #3 adjusted REA ratio.

A nice, moderate birthweight leads to performance on through weaning and above average ADG and WDA ratios. His dam is off to a great start and is the product of multiple generations of MPPAs over 100. Seven EPDs are in the top 7% or higher, with standouts in growth, maternal and carcass, including the #1 Marbling EPD in the class. He carries extra length and a nice profile with a laser straight top.

Beautiful cherry red bull with a nice profile, tight sheath and extra thickness. His personal performance gives him the #2 adjusted WW and the #5 WDA. A high-production dam posts an MPPA of 107 on 6. Her progeny have an average WR of 108 with none below 100, and an average YR of 104. **This bull is a category II.**

This bull checks all the boxes. Here's a heifer bull that can move right into the mature cow pasture as he ages. He will be able to produce replacements or send feeders to the pen with tremendous carcass potential. His GM Index sits at the top of the breed and is #1 in the class, while calving ease numbers are in the top 1/3 and growth is in single-digit percentiles. If you want to purchase a versatile addition to your bull battery, look no further.

This is one of those bulls you look at and just know he's going to produce a lot of pounds of beef in the fall. He shows extra length and capacity and has single-digit percentile growth numbers. His dam has a 105 MPPA on 4 with an average WR of 106 and none under a 101. If you want pounds at weaning don't hesitate to take this one home.

This is one of the bulls that has always been noticed, whether it was in the pasture as a calf, or growing out on test in the feedlot. The growth ratios don't do him justice. Phenotype is all there with a broad and straight topline. He shows extra capacity and thickness. His number set shows a bull that will compliment his females. There are standouts in every category. Over half are in the top 25% or higher with all but four in the top half of the breed. Just a very solid bull.

Growth and carcass specialist! All carcass EPDs are in the top 20% or higher and growth numbers are in the single digits. Overall, 11 are in the top 25%. The Pridstom family does it again, with his dam turning in a 104 MPPA on 4 calves. Her average WR is 105 and YR is 107. This is the maternal lineage that goes back to 1956 before you find a dam with an MPPA of less than 100.

Growth and carcass are the name of the game. An ADG ratio of 103 shows growth through yearling. A nice carcass scan gives him a 129 IMF ratio that sits at #5 in the class. Extra depth and thickness are combined with a square rear quarter. Carcass EPDs rank at the top of the breed and back up a top 3% GM Index.

Don't let the extreme low birthweight throw you a curve. He was 8 days early but went on to perform well at weaning and yearling and turned in above average carcass scans. He comes from the great Estonia cow family with generations of MPPAs of 100 or higher, going clear back to a 1977 born dam. The number set is impressive with all but 5 in the top half of the breed and a baker's dozen in the top 1/3 Antagonistic traits of calving ease and growth are all in single digits.

Here's a case of 'life just ain't fair.' He didn't get any ratios because his mom got lumpjaw before going to summer pasture, so they stayed at home base. He has a nice straight topline and rear quarter and a great disposition. Feet and leg scores are excellent. Calving ease is all there and he still maintains a strong set of growth and carcass numbers.

Another great Lakota dam with a 105 MPPA is at work here. Look for extra length and a great disposition. Numbers reveal a top-notch HB, Milk and Stay. When combined with the power of the dam you need to start thinking of replacements!

Sleep all night knowing that this guy bred your heifers. He has that heifer bull look with a small head and smooth made shoulders. His dam has an MPFA of 103, with below average birth weights, and sits in the top 20% of the herd for production. Going back through the pedigree you find Estonia dams producing some stand- out heifer bulls. All calving ease numbers sit in the top 1% of the breed, with the #1 BW and CED in the offering.

Extra length, depth and thickness are a great combination on this bull. ProS and HB are in the top quarter of the breed and there are standouts from growth to carcass, all while keeping GM in the top 27%.

## RED ANGUS GUIDE TO EPDS

RedAngus.org

**ProS**..... Profitability and Sustainability is an all-purpose index that predicts average economic differences in all segments in the beef supply chain. This index is a combination of the breeding objectives modeled in the HerdBuilder and GridMaster selection indexes. In this index, replacement heifers are retained from within the herd and all remaining progeny are fed out to slaughter and sold on a quality-based grid. Traits included in this index include calving ease, growth, HPG, STAY, Mature Weight, Dry Matter Intake and carcass traits. The resulting index is expressed in dollars per head born (Index/High Value).

**HB**..... HerdBuilder is a maternal selection index that predicts the economic differences of animals for traits that are important from conception through weaning. Expressed as dollars per head born, HB is calculated based on the scenario that bulls are mated to heifers and cows, replacement heifers are retained and all remaining progeny are marketed at weaning. Traits included in the HB index include Calving Ease Direct, Calving Ease Maternal, Weaning Weight, Milk, Mature Weight, Heifer Pregnancy and Stayability (Index/High Value).

**GM**..... GridMaster is a selection index that predicts the average economic difference of non-replacement calves through the post-weaning phase of production. GM places selection pressure on growth, feedyard performance and carcass traits. Expressed as dollars per head born, GM is calculated based on the scenario that progeny are fed out to slaughter and marketed on a quality-based carcass grid. Traits included in GM include Average Daily Gain, Carcass Weight, Dry Matter Intake, Marbling, Back Fat and Rib Eye Area (Index/High Value).

**CED**..... Calving Ease Direct predicts differences in the percent of calves born unassisted out of 2-year-old dams. (Percent/High Value)

**BW**..... Birth Weight predicts differences in actual birth weight of progeny. (Pounds/Low Value)

**WW**..... Weaning Weight predicts differences in 205-day weaning weight. (Pounds/High Value)

**YW**..... Yearling Weight predicts differences in 365-day yearling weight. (Pounds/High Value)

**ADG**..... Average Daily Gain predicts differences in weight gain between 205 and 365 days of age. (Pounds/High Value)

**DMI**..... Dry Matter Intake predicts differences in daily feed intake as measured in a feedlot during the post-weaning period. (Pounds/Low Value)

**MILK**..... Milk predicts differences in weaning weight attributed to the milking ability of the animal's daughters. (Pounds/High Value)

**ME**..... Maintenance Energy predicts the difference in maintenance energy requirements. (Mcal per Month/Low Value)

**HPG**..... Heifer Pregnancy predicts differences in the percent of daughters who are able to conceive and calve at 2 years of age following exposure to breeding. (Percent/High Value)

**CEM**..... Calving Ease Maternal predicts differences in the percent of daughters who are able to calve unassisted as 2-year-old heifers. (Percent/High Value)

**STAY**..... Stayability predicts differences in the ability of an animals' retained daughters to remain productive in the herd – calve every year – through 6 years of age. (Percent/High Value)

**MARB**..... Marbling predicts differences in marbling score – amount of intramuscular fat measured at the 13th rib. (Marbling Score Units/High Value)

**YG**..... Yield Grade predicts differences in USDA Yield Grade, which is calculated using CW, REA and Fat. (Yield Grade Units/Low Value)

**CW**..... Carcass Weight predicts differences in actual hot carcass weight. (Pounds/High Value)

**REA**..... Ribeye Area predicts differences in square inches of ribeye area measured at the 13th rib. (Square Inches/High Value)

**FAT**..... Fat predicts differences in the depth of backfat measured between the 12th and 13th ribs. (Inches/Low Value)

# PARAMOUNT

Now is a paramount time to verify your genetics in the Feeder Calf Certification Program. The Red Angus Live Animal Specification, recognized by the USDA, acknowledges **Red Angus are genetically Angus and meet requirements to be included in many Angus branded-beef programs.**

**Genetics, not hide color,  
qualify an animal as Angus.**

**Visit RedAngus.org**

**RED ANGUS**  
RANCH TESTED. RANCHER TRUSTED.

*Jim, a fifth-generation Montana rancher and professional photographer, documents the ranching way of life. His images transcend modern-day and make one feel like they are actually there.*
